Education

Indian Institute of Technology Ropar

Major Certification in Artificial Intelligence

Jan 2025 – Jun 2026

Sarala Birla University

Bachelor of Technology in Computer Science and Engineering

Jul 2022 – Jun 2026

Technical Skills and Interests

Programming Languages: Python, JavaScript, TypeScript, React, Tailwind, Node.js, MongoDB

Tools and Technologies: Git, Linux, Firebase, OpenCV, Supabase, PostgreSQL, Express.js, PM2

Interests: Data Structures, Machine Learning, Computer Vision, Artificial Intelligence

Experience

Trainee Software Engineer @ HUMB Global HealthTech India Pvt. Ltd.

Jun 2026 – Present

- Developing full-stack healthcare applications with scalable frontend and backend features, focused on performance, reliability, and production-ready code quality
- Built AI-powered clinical reporting workflows by integrating LLM-based services, optimizing data persistence and responsiveness through rigorous testing and deployment
- Exposure:** React.js, TypeScript, Node.js, Express.js, PostgreSQL, REST APIs, AI/LLM Integration, PM2

Software Developer Intern @ CodSoft

Sep 2025 – Dec 2025

- Built scalable, responsive front-end applications in React.js with a modular, reusable component architecture and efficient state management across workflows
- Crafted consistent responsive interfaces using **Tailwind CSS**, ensuring cross-device compatibility and adherence to modern UI/UX principles
- Exposure:** React.js, JavaScript, Tailwind CSS, Frontend Optimization, Responsive UI

AI Dialogue Systems Engineer @ Outlier

Aug 2024 – Aug 2025

- Used large-scale transformer models to analyze billions of text samples at a **92%** comprehension rate, applying multi-turn context management and reinforcement learning
- Formulated structured prompts that reduced response errors by **35%** via token optimization, hierarchical prompting, and real-time feedback loops
- Exposure:** Large Language Models, NLP, Reinforcement Learning

Software Testing Specialist @ Sirius BnB

Jul 2023 – Aug 2023

- Conducted functional and performance testing of gaming sessions, identifying bugs and ensuring test-case compliance across diverse hardware environments
- Used **Selenium**, **Appium**, and **JIRA** for bug tracking, implementing unit, regression, and cross-browser testing methodologies
- Exposure:** Functional Testing, Selenium, Appium, JIRA

Projects

HireSense – AI-Powered Applicant Tracking System

Jan 2026 – Present

- Built an intelligent hiring platform using AI to automate resume screening, generate candidate insights, and enable data-driven recruitment decisions
- Developed resume parsing, candidate ranking algorithms, and role-based recommendations, reducing manual screening effort and improving hiring efficiency
- Exposure:** AI/ML Integration, REST APIs, Authentication Systems, Data Processing, React

WAUREM – Intelligent Waste Classification

Jan 2024 – Apr 2024

- Developed a CNN-based waste segregation system using image recognition, trained on ImageNet-derived datasets for higher accuracy and scalability
- Built a computer vision pipeline with **OpenCV** (preprocessing, augmentation, feature extraction), achieving **85% accuracy** across varied conditions
- Exposure:** CNN, OpenCV, Scikit-learn, Computer Vision, Deep Learning

Honours and Achievements

- Specialist** on Codeforces with maximum rating of **1406** and best global rank of **867** in Round 920 (Div 3)
- Maximum contest rating of **1772** and among top **10.35%** on LeetCode with **700+** problems solved
- Silver Medal** at Planet Hunt (ML-based planet detection), Yuri's Night 2024, IIT (BHU) Varanasi
- Member of **Google Developer Student Clubs**, attended events on JavaScript and Web Development
- Completed Udemy certification on **GenAI for Professionals: 10x Your Productivity**, gaining practical generative-AI productivity skills
- Completed seven-day Web Development BootCamp by **Campus Code** and built a To-Do list application
- Attended national webinar on **Recent Trends of Photonics with Applications** organised by SBU, Ranchi
