Education

Indian Institute of Technology Ropar

Jan 2025 – Jan 2026

Minor in Artificial Intelligence

Sarala Birla University

Jul 2022 – Jun 2026

Bachelor of Technology in Computer Science and Engineering

Technical Skills and Interests

Programming Languages: Python, JavaScript, TypeScript, C++

Tools and Technologies: Git, Linux, Firebase, OpenCV, Supabase

Interests: Data Structures, Machine Learning, Computer Vision, Artificial Intelligence

Experience

Software Developer Intern @ CodSoft

Sep 2025 – Dec 2025

- Worked as a Software Developer Intern at CodSoft, building scalable and responsive front-end applications using React.js with a focus on modular, reusable component architecture and efficient state management across different application workflows
- Crafted visually consistent and responsive interfaces using **Tailwind CSS**, ensuring cross-device compatibility, smooth user interaction, and adherence to modern UI/UX design principles across multiple screen sizes
- Exposure:** React.js, JavaScript, Tailwind CSS, Frontend Optimization, Responsive UI Development

AI Dialogue Systems Engineer @ Outlier

Aug 2024 – Aug 2025

- Used large-scale transformer-based models, analyzing billions of text samples with a **92%** average comprehension rate and employed **multi-turn context management** and advanced reinforcement learning to optimize user interaction strategies
- Formulated carefully structured instructions for improved model performance, reducing response errors by **35%** through token optimization, hierarchical prompting, and real-time feedback loops for more accurate outputs
- Exposure:** Large Language Model, Natural Language Processing, Reinforcement Learning

Artificial Intelligence GUC Summer Cohort 1.0

Jun 2024 – Jul 2024

- Developed an AI-driven **image classification system** using (CNNs) and datasets like ImageNet, utilizing **Scikit-learn** for model training, validation and fine-tuning hyperparameters and optimizing model accuracy by **85%** and efficiency by **45%**
- Exposure:** Neural Networks, TensorFlow, Python, Deep Learning, CNN

Software Testing Specialist @ Sirius BnB

Jul 2023 – Aug 2023

- Conducted **functional and performance testing of gaming sessions**, identifying bugs, glitches, and ensuring compliance with defined test cases using both manual and automated testing tools across diverse hardware environments
- Utilized tools like **Selenium, Appium, and JIRA** for bug tracking and implemented unit testing, regression testing, and cross-browser testing methodologies to assess performance across multiple platforms
- Exposure:** Functional Testing, Selenium, Appium, JIRA

Projects

HireSense- AI-Powered Applicant Tracking System

Jan 2026 – Present

- Built **HireSense**, an intelligent hiring platform leveraging AI to automate resume screening, generate candidate insights, and enable smarter, data-driven recruitment decisions
- Developed key features including **resume parsing, candidate ranking algorithms, and role-based recommendation systems**, reducing manual screening effort and improving hiring efficiency
- Exposure:** AI/ML Integration, REST APIs, Authentication Systems, Data Processing, Responsive UI, HTML5, CSS, JavaScript, React

WAUREM

Jan 2024 – Apr 2024

- Developed **Waurem**, an intelligent waste classification system using CNN architecture to automate waste segregation through image recognition, trained on ImageNet-derived datasets for higher accuracy and scalability
- Built a complete computer vision pipeline with **OpenCV**, including preprocessing, augmentation, and feature extraction, achieving **85% accuracy** and improving model robustness across varied environmental conditions
- Exposure:** CNN, OpenCV, Scikit-learn, Computer Vision, Deep Learning, Image Processing

Honours and Achievements

- Member of **Google Developer Student Clubs**, IIT (BHU) Varanasi, attended events on JavaScript, Web Development
- Specialist** on Codeforces with maximum rating of **1406** and best global rank of **867** in Codeforces **Round 920 (Div 3)**
- Silver Medal** at Planet Hunt (**ML based planet detection**) event organised by Yuri's Night 2024, IIT (BHU) Varanasi
- Maximum contest rating of **1772** and among top **10.35%** users on Leetcode with **700+ problems solved**
- Completed seven days of web development BootCamp organised by **Campus Code** and developed To-Do list
- Attended one day national webinar on **Recent Trends of Photonics with Applications** organised by SBU, Ranchi
- Completed Udemy certification on **GenAI for Professionals: 10x Your Productivity**, gaining practical skills in generative AI-based productivity enhancement.
